MAKING YOUR BLACKBOARD COURSE AVAILABLE TO STUDENTS

If your course is not active, it can't be accessed by students. You can control when your course is private, or unavailable, to your students. You can quickly change the availability of your course in the top management area, by selecting the Make Available icon.

Course availability can also be set in the Control Panel:

1. Under the Control Panel, click Customization.
2. Click Properties.
3. Under Set Availability, select Yes to make the course available.
4. Click Submit.
